

Watering small Mounted Staghorn Ferns

First thing they need is filtered sunlight. You should water 2 times a week in the Spring and Fall and once a week in the Winter.

Summer months if hot or windy at least 3 times a week. We recommend submerging the board in a bucket of water every 3 weeks to make sure the moss is completely wet. You can fertilizer at this time using Water soluble fertilizer 20-6-16 or 20-20-20
